

PPC Lavrio Unit V

Combined Cycle Power Plant

Full turn-key scope of supply, state-of-the-art natural gas fired power plant

Description

- Project location: Lavrio, Attica Region, Greece
- EPC Contract, including engineering, procurement, transportation, construction and commissioning for the unit. Scope includes interconnections with the DEPA gas network and PPC 400 kV Substation
- Long-term maintenance agreement for the gas-turbine, initially for 6 years, with option to extend the period for an additional 6 years.

Project Data

Configuration	Single shaft
Gas Turbine	GE 109FA
Fuel	Natural gas
Power Output	377.66MW net
Cooling System	Seawater condenser

Schedule

Contract	January 2004
First Firing	February 2006
Comm. Operation	April 2006
